

Mohammad Danish Ansari

Noida, UP, India | +91 7300969491 | danishansari.dev@gmail.com | linkedin.com/in/danishansari-dev | github.com/danishansari-dev

Education

Indian Institute of Information Technology, Dharwad

2022 – 2026

B.Tech in Data Science and Artificial Intelligence

Relevant Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures & Algorithms, DBMS, OS, Statistical Modeling

Technical Skills

Machine Learning & Deep Learning: PyTorch, TensorFlow, scikit-learn, CNNs, Computer Vision, Feature Engineering, Model Evaluation, Hyperparameter Tuning

Generative AI & NLP: LLaMA 3.3 70B (Groq API), OpenAI Embeddings, RAG, Supabase (pgvector), Vector Search, TextRank, LSA, Hugging Face, Prompt Engineering

Data Science & Analytics: Python, SQL, pandas, NumPy, Power BI, Matplotlib, Seaborn, Automated Data Pipelines, Market & Behavior Analytics

MLOps & Infrastructure: FastAPI, Flask, Docker, RESTful APIs, Git, GitHub Actions (CI/CD), PostgreSQL, Vercel, Railway, Linux

Experience

Founding Engineer & Technical Lead

2024 – Present

Scrunch and Create – E-Commerce Platform

scrunchcreate.com

- Formulated automated Python image processing pipeline for 1,000+ product assets, implementing batch optimization reducing manual effort by 80%.
- Built high-performance React + Vite frontend achieving sub-2s page loads and responsive design, supporting 500+ orders with 4.5-star user rating.
- Engineered static file-system data organization for 200+ product variants, eliminating backend server overhead and cutting infrastructure costs to zero.
- Developed custom data analytics framework for cost modeling, market trend evaluation, and consumer behavior tracking to optimize pricing strategies.
- Configured CI/CD pipeline using GitHub Actions, decreasing deployment duration by 60% with automated build validation checks.

Projects

NeuralRead – Chrome Extension & Generative AI SaaS Platform

2025 – 2026

neural-read-dashboard.vercel.app github.com/danishansari-dev/neural-read

- Engineered RAG-powered text summarization engine achieving 85%+ relevance accuracy across 500+ articles using Python, FastAPI, and TextRank/LSA.
- Deployed high-concurrency FastAPI microservice with OpenAI embeddings and Supabase vector DB (**pgvector**) executing sub-150ms similarity queries.
- Built dynamic React dashboard with D3.js force-directed knowledge graph visualization rendering semantic topic clusters in real time.
- Architected Manifest V3 Chrome extension with content scripts for DOM extraction and background service workers for API communication.

AI GitHub Analyzer – Developer Analytics & LLM Tool

2025 – 2026

ai-github-analyzer.vercel.app github.com/danishansari-dev/ai-github-analyzer

- Developed full-stack AI evaluation platform reducing candidate repository audit time from 10+ mins to sub-3s using PyGithub and LLaMA 3.3 70B (Groq API).
- Built automated portfolio assessment engine parsing repo metadata and commit patterns to compute job-fit scoring models across 5 tech roles.
- Designed responsive React + Tailwind CSS web interface displaying dynamic score visualization charts and automated resume bullet generation.
- Deployed backend service on Railway and frontend on Vercel with environment security configuration and rate-limited request handling.

PyTorch Digit Recognition & CNN Benchmark

2024

github.com/danishansari-dev/Pytorch-Handwritten-Digit-Recognition

- Implemented modular Convolutional Neural Network (CNN) in PyTorch for handwritten digit classification, achieving 99.2% test set accuracy.
- Executed systematic hyperparameter tuning and error diagnostics using confusion matrices and cross-entropy loss tracking to optimize convergence.
- Built reproducible experimentation pipeline with automated model evaluation, checkpoint saving, and metric logging.

Leadership & Certifications

Certifications: Python 101 for Data Science (IBM / Cognitive Class), Java (Basic) (HackerRank)

Leadership Experience: Creative Team Lead, OSCode Club – IIIT Dharwad (2024 – 2025) | Directed cross-functional team in executing technical events impacting 500+ students across campus; managed digital publicity and engagement campaigns.
